

CROSSUB Tenant App - User Guide

Manage your tenancy from move-in to move-out

August 2026

crossub.com.au

Introduction

The CROSSUB Tenant app is your single place to view your lease, pay rent, report repairs, complete inspections, message your property manager, and manage move-in and move-out. This guide walks through each part of the app in the order most tenants use it.

Contents

1. Sign in & first steps
2. Home dashboard
3. Property & lease
4. Applying & move-in
5. Repairs & maintenance
6. Inspections
7. Rent & accounting
8. Messages & notifications
9. Moving out
10. Help & support

1. Sign in & first steps

Your property manager sends tenant login credentials after your lease is set up. Use that email and password on the sign-in screen.

Steps

- * Open the CROSSUB Tenant app and tap Sign in.
- * Enter the email and password your agent provided.
- * Complete any welcome or onboarding prompts on first login.
- * If you forget your password, tap Forgot password? or contact your property manager.
- * Browse listings without signing in if you are still looking for a rental.

Tips

- * This app is for tenants only - staff accounts use the CROSSUB admin portal.
- * If no property appears after sign-in, ask your agent to resend tenant credentials from your approved application.

2. Home dashboard

Home shows your tenancy at a glance - urgent actions, property summary, repairs, accounting, and messages.

Steps

- * Welcome card - your name and property address when a lease is linked.
- * Action required - ingoing/outgoing inspections, rent reviews, completion approvals, and end-of-lease tasks.
- * Your tenancy - quick links to Property, Inspection, Repair, Accounting, and Messages.
- * Tap any card to open the full screen for that area.

3. Property & lease

The Property tab shows your address, rent, key dates, and links to your lease documents.

Steps

- * Open Property from the bottom navigation or Home.
- * View weekly rent, lease start and end dates, and renewal reminders.
- * Open My lease for tenancy agreement PDFs and lease status.
- * Find all documents under Documents in the menu - receipts, bond proofs, and statements.

4. Applying & move-in

New tenants apply from Browse listings, then complete onboarding before move-in is official.

Steps

- * Browse listings -> open a property -> submit an application when enabled.
- * Track application status under Applications in the menu.

- * After approval, complete the onboarding checklist: deposit, bond, lease signing, and keys.
- * Upload payment proofs when requested; your agent confirms each step.
- * Confirm your ingoing condition report section by section to finalise move-in.

5. Repairs & maintenance

Report issues, track progress, message your agent or contractor, and approve completed work.

Steps

- * Open Repair -> Report a repair.
- * Choose the issue type, describe the problem, and attach photos if helpful.
- * Mark urgent only for eligible emergencies (e.g. flooding, lockout, no hot water, electrical fault).
- * Track status under Active repairs; view completed jobs under History.
- * When work is finished, approve completion from Home or the repair detail screen.

Tips

- * For life-threatening emergencies (fire, gas leak, serious injury), call emergency services first.

6. Inspections

Ingoing, outgoing, and routine inspections keep a record of your property condition.

Steps

- * Open Inspection from Home or the Inspections list.
- * Ingoing - confirm each section at move-in.
- * Routine - complete self-inspection checklists when assigned, or be available for scheduled visits.
- * Outgoing - confirm each section at move-out and upload supporting photos when asked.
- * Flag maintenance issues during an inspection to create a repair request.

7. Rent & accounting

Pay rent, view your current rate, and download receipts from the Accounting tab.

Steps

- * Open Accounting -> Overview to see your current rent and payment instructions.
- * Upload payment proof when requested so your agent can reconcile your account.
- * Open History for rent receipts and charges.
- * When you receive a rent review notice, open Rent review to accept, decline, or counter offer.
- * Use Lease renewal to confirm whether you intend to stay when your lease is ending.

8. Messages & notifications

Stay in touch with your property manager and get alerts when something needs your attention.

Steps

- * Open Message from the bottom navigation.
- * Start a new thread and choose a topic: leasing, maintenance, inspection, or accounting.
- * Tap the bell icon for in-app notifications - approvals, inspections, maintenance updates, and more.
- * Adjust notification preferences under Settings.

9. Moving out

Give notice, complete outgoing inspection, and confirm bond settlement through the app.

Steps

- * Use Lease renewal or End of lease to set a vacating date when your lease is ending.
- * If you receive a termination notice, respond by the date shown and confirm your move-out plan.
- * Complete the outgoing condition report and any make-good items.
- * Confirm bond settlement when End of lease shows it is ready for your review.

10. Help & support

Additional resources if you get stuck.

Steps

- * FAQ - expandable answers in the menu under FAQ or Settings.
- * App tutorial - short overview under App tutorial in the menu.
- * Send a message to your property manager for anything not covered here.
- * Profile - update emergency contact and view your application history.
